

home page contain 7 cards that are Hidding

1 water

2 food

3 coat

4 shoes

5 warm blanket

6 school supp

7 first midkit

in a SINGLE PAGE

each card will have a diff price to make sences

I do a navbar I don't know what will the other bnt will do but will do normal nav bar maybe stick with the cart iside of it to

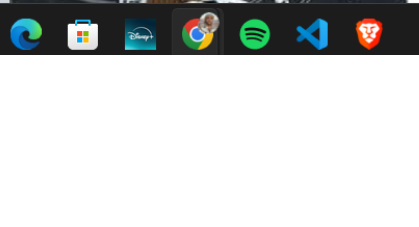

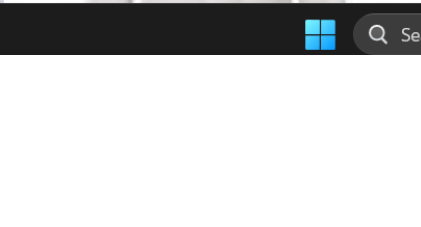

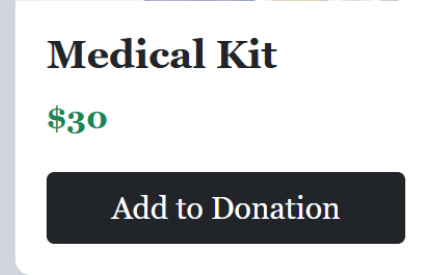

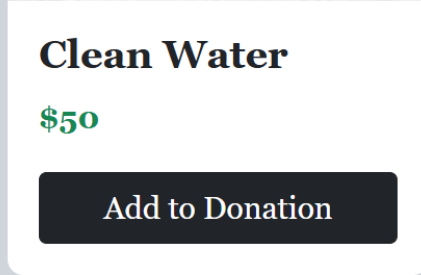

be easy to reach all the time will add pics to everyone the hiddin page will have data like address and zipe code when its more than 6 digits
will give a warning using js will apper on the top of the page alert

navbtns willnot work I have no idea what to refaer them to so ill leave them to look good that's it

I used card and use js to make them apper on the webpage using DOM and for event lisntners I used on click

for the math logic was from a yt video free course for js on BROCODE

boot strap I used the grid system to make the main content apper as good as possible
